PERSONAL PROJECTS

Gazetteer – Interactive Global Location Finder
(02/2025 - Present) [🔗](#)

- **Tech Stack** : HTML, Bootstrap, jQuery, Leaflet.js, PHP (cURL), AJAX
- Developed a dynamic web app that displays country data including weather, currency, Wikipedia links, and news.
- Integrated multiple APIs (GeoNames, OpenCage, Exchange Rates, WeatherAPI) to present real-time location-specific insights. Built with responsive design and interactive maps using Leaflet.js.

Company Directory – CRUD Web App
(04/2025 - Present) [🔗](#)

- **Tech Stack** : HTML, Bootstrap, JavaScript (AJAX), PHP, MariaDB
- Created a responsive web interface to manage employee records using full CRUD functionality.
- Backend powered by PHP with JSON and MariaDB for data persistence.

QuickSBA.com (09/2020 - Present) [🔗](#)

- **Tech Stack** : React, Laravel, MySQL, TailwindCSS
- Built an EdTech platform for generating assessments, terminal reports, and academic summaries.
- Designed to support teachers in basic schools across Ghana with automated performance tracking.

Deimageprint.com – Interior Design Website
(06/2022 - Present) [🔗](#)

- **Tech Stack** : HTML5, CSS, JavaScript
- Built a portfolio-style site for an interior design firm to showcase design projects.
- Emphasized visual appeal, performance, and mobile responsiveness.
